

# F-16 Platform:

Honeywell systems and solutions increase reliability and performance while reducing life cycle costs

- 1 Common Color Multifunction Display (CCMFD)**  
The CCMFD is a drop fit replacement for existing systems and Night Vision Imaging Systems (NVIS) compliant. It offers 30-60-watt savings per aircraft and provides LED technology.
- 2 Advanced Central Air Data Computer**  
New state-of-the-art data computer that greatly enhances performance, resolves obsolescence issue and delivers long-term supportability.
- 3 Emergency Power Unit**  
Redesigned turbine wheel increases service life with peace of mind from Honeywell OEM parts.
- 4 Air Cycle Machine**  
Redesigned air cycle machine increases reliability, reduces contamination in airflow and maintains load capacity.
- 5 Cabin Air Pressure Regulator & Temperature Control**
- 6 Pneumatic Sensor Assembly**
- 7 Emergency Power Unit Controller**
- 8 Emergency Power Unit Gas Generator**
- 9 Emergency Power Unit Heat Exchanger**
- 10 Hydrazine Fuel Tank**
- 11 Environmental Digital Sensor Controller (EDSC)**
- 12 Engine Bleed Air Actuator**
- 13 Engine Exhaust Nozzle Flex Shafts**
- 14 Engine Exhaust Nozzle Actuators**

- 15 Engine Compressor Vane Actuator**
- 16 Engine Augmentor Fuel Pump Controller**
- 17 Engine Main Fuel Control**
- 18 Engine Module Kits**
- 19 Convergent Exhaust Nozzle Control**
- 20 Programmable Display Generator**
- 21 Engine Variable Bleed Air Valves**
